

Proton and Radiation Therapy Center in CGMH, Linkou

Precautions for radiation safety in the controlled area

1. The controlled area consists of the general controlled area (yellow) and the radiation-controlled area (red).
2. The radiation controlled-area include the accelerator room, the beam transport room, the 1st ~ 4th treatment room (G1 ~ G4) and the 5th experiment room (F5).

3. All visitors need to fill “Application form for access the controlled area” and wear the personnel dosimeter before entering the controlled area.
4. All visitors need to follow the regulations of the proton center and comply with the instructions of the radiation protection personnel.
5. For radiation safety, no smoke, eat and drink is allowed in the radiation controlled-area.
6. To prevent the radiation accidents due to entering the high-dose region, please constrain yourself within the allowed area.

If you have any question, please contact

the radiation protection officer: David Chen (0975-366-295) or

Research assistant: Yi-Chun Tsai (MoMo) (e-mail: momoco.1101@gmail.com)
